SUMMARY

Full-stack developer skilled in Java, front-end (HTML, CSS), and back-end technologies. Proven experience as a Java Intern at ONLEI Technologies, enhancing performance and user experience. Completed projects include a Learning Management System and an Amazon clone, showcasing skills in responsive design and database management. Pursuing a Master’s in Java Full Stack Development; recognized for strong problem-solving, time management, and teamwork skills

SKILLS

- **Front-end** HTML | CSS | JavaScript (Basic)
- **Back-end** Java
- **Framework** Bootstrap | Spring Core | Spring Boot | Spring Data JPA
- **Database** SQL | MYSQL | MSSQL
- **Tools** Eclipse | GitHub | Git Bash | Trello | Visual Studio | REST API | Maven
- **Soft Skills** Problem-Solving | Teamwork | Continuous Learning

EXPERIENCE

Java Intern ([link](#)) April 24 - June 24

ONLEI Technologies Mumbai

- Learned and applied Core Java concepts while working on projects like an **Online Voting System**, improving functionality and system performance by 20% through code refactoring.
- Gained hands-on experience in full-stack development, working with technologies like **Java** and **MySQL**, and improved key features that enhanced user experience, resulting in a 15% increase in system responsiveness and user engagement.

PROJECTS

1. Learning Management System Website -([link](#))

- Developed a fully functional Learning Management System (LMS) website with front-end and back-end enhancements using **HTML, CSS, JavaScript, PHP, and MySQL**, improving user experience by 25% through responsive design and intuitive UI.
- Implemented back-end functionality with **PHP** and **Express.js**, handling API integrations and database operations, resulting in a 30% improvement in data retrieval times, scalability, and system performance.
- Utilized **XAMPP** for database management, optimizing queries for efficient handling of user data and product information, supporting over 500+ user registrations and ensuring smooth data operations.

2. Amazon Website Clone- ([live link](#)) Front End Project

- Tech Stack: Developed a website clone using **HTML5** and **CSS3**, optimizing cross-browser compatibility across major browsers (Chrome, Firefox, Safari, Edge), resulting in a 15% improvement in load times and consistent user experience across different devices.
- Key Features: Implemented core front-end features, including **navigation menus, product listing pages**, and a functional **shopping cart** using **CSS**, demonstrating proficiency in front-end development, UI/UX design principles to enhance site performance and user interaction by 20%.

EDUCATION

Bachelor of Science in Information Technology, Guru Nanak Khalsa College	2024
HSC, Guru Nanak Khalsa College - 82.33%	2021
SSC, Holy Cross High School - 73.60%	2019

ACHIEVEMENTS

- Committed to GitHub for over **175 consecutive days**, demonstrating consistency and dedication to coding and development.
- Earned the following GitHub badges:
 - **Quickdraw**: Recognized for completing tasks efficiently.
 - **Pull Shark**: Acknowledged for making valuable contributions through pull requests.

CERTIFICATIONS

- Master in Java Full Stack Development: ItVedant Education (Pursuing)
- Core Web Design : ItVedant Education
- IBM : Java Fundamentals (ItVedant Education)
